

Verity 340B[®] Compliance Manager

Maintaining your 340B program compliance has never been easier.

Making sure your 340B program stays compliant with all rules and regulations can be difficult. Covered Entities must know which areas of compliance are most at risk, be able to uncover and examine issues, and know when and how to perform audits.

Verity simplifies this process with our web-based Verity 340B[®] Compliance Manager, which stores your 340B program documentation and provides tools for you to fulfill your self-audit requirements.

-  HIPAA-compliant document library allows for storage of all 340B-related materials, including policies and procedures; contract pharmacy agreements and transaction audit spreadsheets.
-  Quick and simple set-up and training, and with no need for interfaces or data feeds means most customers can start benefiting from improved compliance on day one.
-  Unique risk scoring helps spotlight areas for improvement.
-  Built to support HRSA and manufacturer audits and the tracking of all 340B purchases from multiple vendors.
-  Expert-defined tasks and assessment steps cover every aspect of 340B programs, including governance, eligibility, documentation and transactional audits.
-  Dashboards show all scheduled and in-progress activities, with real-time notifications of assigned and completed tasks.
-  Enhances any existing 340B Program, regardless of which Third Party Administrator you use.
-  Role-based separation of duties ensures that proper oversight occurs.
