

Verity 340B[®] Split Billing

Maximize compliance and savings with V340B[®] for mixed use

A successful 340B program requires up-to-date business rules and technology with industry-leading accuracy and proven results. Verity 340B[®] Split Billing allows you to optimize your savings on qualified transactions while maintaining program compliance.

Order

Automatically split replenishment orders for eligible medications into as many accounts as necessary (e.g. 340B, WAC, GPO, etc.) to meet your individual needs.

Customize

Includes innovative features such as acquisition cost billing, orphan drug management, and central distribution support.

Optimize

Matches pharmaceutical usage with wholesale order quantities to maximize savings.

Track

Built to support HRSA and manufacturer audits and the tracking of all 340B purchases from multiple vendors.

Integrate

Operates with all major wholesale vendor order-entry and hospital information systems.

Simplify

Eliminates the need for labor-intensive separate inventories.
